MIOX Corporation,  
5500 Midway Park Place NE  
Albuquerque, NM 87109, USA  
For the attention of Mr. William R. Obermann, P.E.  
President & CEO

Dear Sir,

I wish to express my sincere thanks to you for your kindness and support rendered to me in connection with your purifier of Model BPS you sent for the Tsunami Disaster in Sri Lanka on January 13 2005.

We knew the potable water disinfection system/equipment is very important and indispensable for the devastated area by Tsunami at this time occurred, and honestly speaking, the actual situation presently fallen is that it will be very difficult indeed to prepare such equipment for ourselves in the presently messed and disordered site.

Under the circumstances, I must say how your sent purifier in supply works of potable water encouraged us to make more help to the sufferers here in need. Such purifier of BPS as you kindly sent is now underway for confirmation of its function and performance by Research & Development Div. so that we may get more knowledge of the purifier and examine how to actually and widely apply. To my first impression, the purifier will look very handy and effective, which I hope will be familiar with the concerned personnel and Bureau.

I wish to extend my thanks again for kind patronage extended and look forward to having your further continued cooperation.

Thanking you in anticipation,

Yours Sincerely,

*Shiro Nakadaira*
